WE CAN TAILOR JOBS FOR YOU

Here at Livingreen Design we offer a full bespoke design and build service to specifiers. With professional product designers on our team, we can take a sketched idea and using our CAD facility provide you with drawings and 3D models for approval prior to manufacture in Advanced Composites, metals, wood or any combination of these as required. Any size and finish can be supplied, with AC particularly suitable for roof gardens or anywhere where weight is an issue. Lighting can easily be incorporated if required as can logos and memorable dates.

A SELECTION OF RANGES WE RECOMMEND.

Remember all planters are available in all colours and handmade in the UK.
