

Artificial Planting Solutions

www.livinggreendesign.com

introduction

With over 25 years experience of supplying the landscape market, Livinggreen Design has a justifiable reputation as a market leader in the design and manufacture of innovative products. In this new brochure we present a complete solution to all your artificial planting requirements. Working with our partners around the world we offer it all – from uniquely sculpted bespoke trees of any size, through artificial green and moss walls, to custom built buxus hedging, a massive range of replica plants for both indoor and exterior use, and finally a comprehensive corporate floristry offering.

Unlike other suppliers our team is led by very experienced horticulturists and florists, who understand what looks ‘real’. We pride ourselves on our customer service and with the help of our professional graphics artists will help you present a scheme that gives the appearance and feel of a living landscape. We can even do some of the hard work for you, delivering fully planted up displays ready to place into a building or garden, or greenwalls built to exactly fit an area and ready to hang.

Working outdoors? No problem, we can design and build greenwalls and plant displays with UV protection that will give many years service.

So next time you need an artificial plant solution, come to the experts – we are here to help!

feature wall

greenwalls, moss walls, feature panels

feature wall

Innumerable feature panels including moss, green walls and feature panels.

All are based on a lightweight, yet strong fibreglass frame fitted with a brilliant hanging system with a built in levelling device that makes installation simple and fast.

All the panels are made, planted and finished here in our own UK workshop, including those featuring our unique natural finishes such as Corten Steel, Verdigris, Vintage metals and Premium Stone.

Adding to functionality are painted panels which can also be signwritten with logos or other information, or to a theme featuring images of your choosing.

You can even include special feature panels that could be planted with live instead of replica plants, or ones with raised designs for added interest.

The Border panels can be used as a feature in their own right as a stand alone piece, or as part of a complete wall.

As always, send us your design ideas and our graphics team will bring them to life with a digital representation, in-situ if you provide us with images of the actual space.

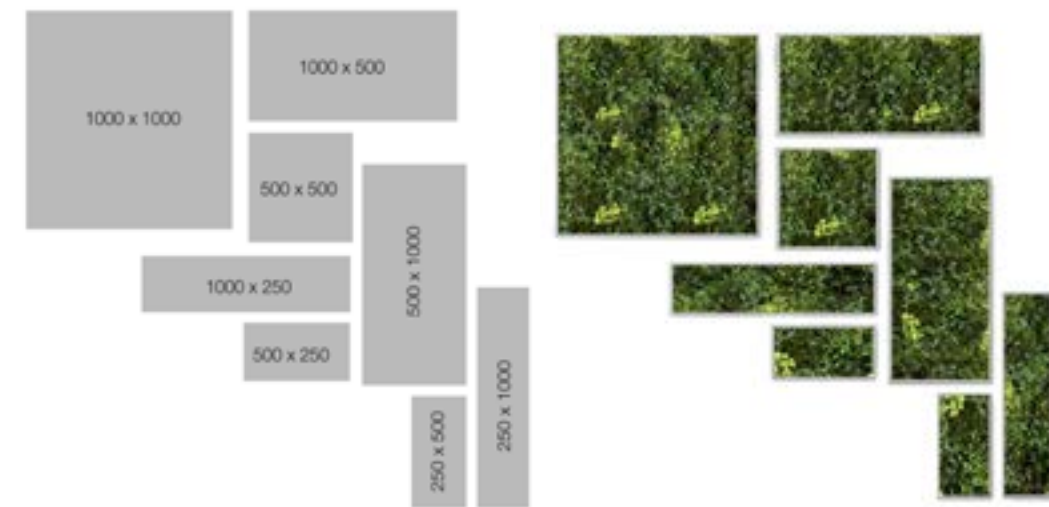

greenwalls

greenwalls frame + mesh

Our Greenwalls are famed for their real feel, for creating a vertical garden that even experienced horticulturists have to look at twice to tell its not live. Each wall is created for individual clients and can feature highlight planting such as more colour, flowering or long trails.

A wall can be built in different ways – either using our 8 standard panels as shown below, or where appropriate for the space, bespoke panels of larger size or different shapes can easily be produced to order. We can also build the same Greenwall on mesh frames and almost any size which are great for large areas and particularly for exterior Greenwalls. These can easily be screwed onto the wall and trimmed on site for a perfect fit.

Available standard sizes
L x H (mm)
500 x 250
250 x 500
500 x 500
1000 x 250
250 x 1000
1000 x 500
500 x 1000
1000 x 1000

greenwall mesh - no frame, bespoke, any shape, no waste, easy to install, economical and available in any size.

green walls

An interior Greenwall might be framed with other panels from our natural or nature range or a bespoke frame can be supplied on request.

frames +

+ mesh

An interior or exterior Greenwall might be constructed on a light mesh support with or without a frame.

exterior green walls

exterior green walls

moss walls standard

Our Moss wall panels can be used in the same flexible way as Greenwall. Put them together to create a large wall and with bespoke sized panels if required, or use singly or mix and match for a feature wall.

Three types of moss are available and can be used singly or in conjunction with others. All panels are put together with mossing pins by our experienced floristry team with a view to longevity as well as initial impact.

Flat Moss

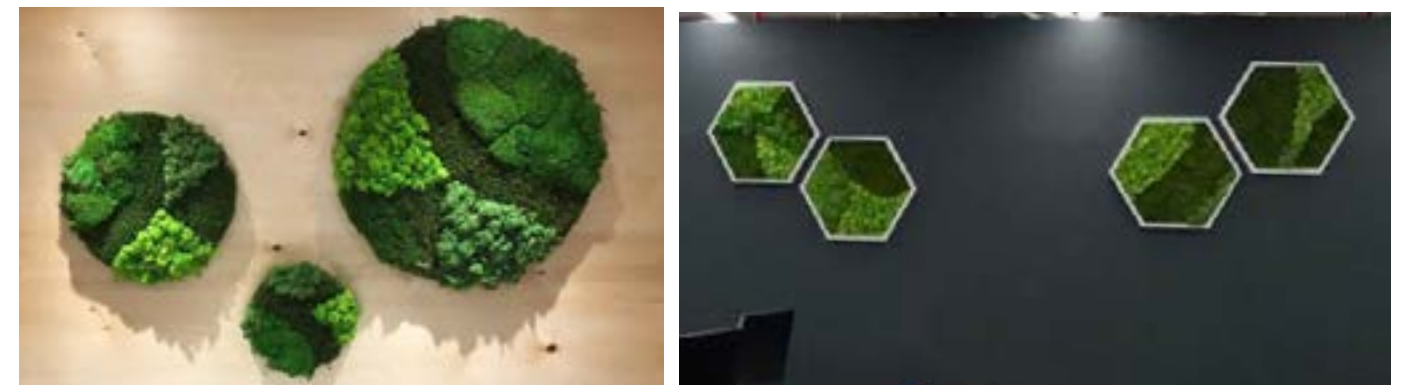

moss walls bespoke

Bespoke panels can easily be created featuring signs or logos some examples of which are shown below. These need to be of a certain size to be possible depending upon the complexity of the design. Please call us to discuss your ideas.

moss walls bespoke

preserved walls bespoke

Bespoke preserved walls created with a moss base and with artificial or preserved highlights

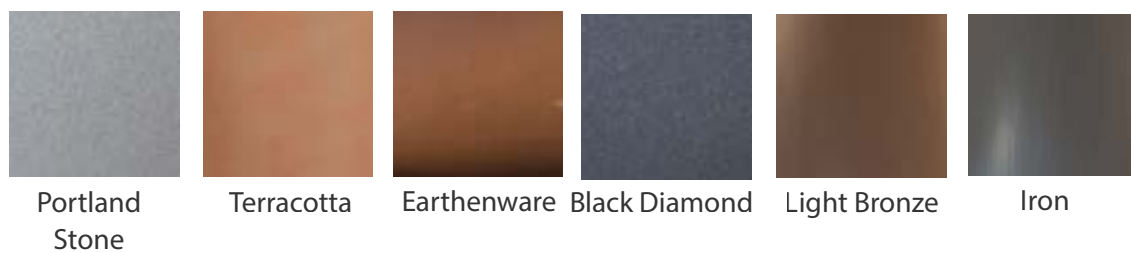

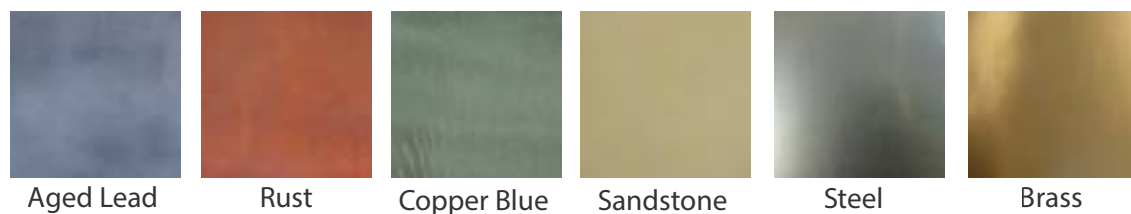

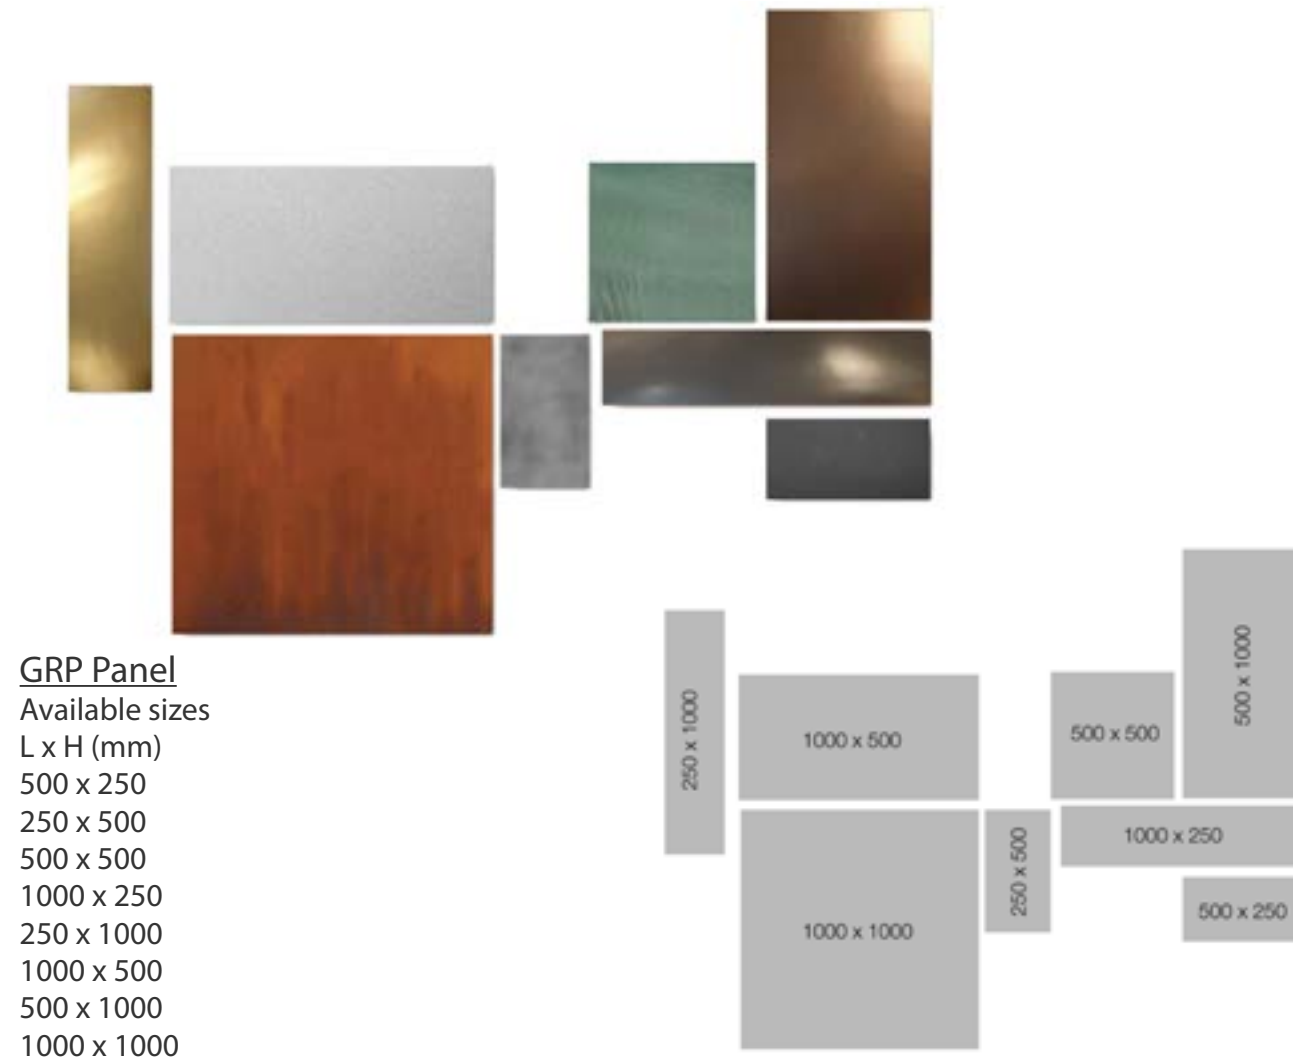

preserved walls bespoke

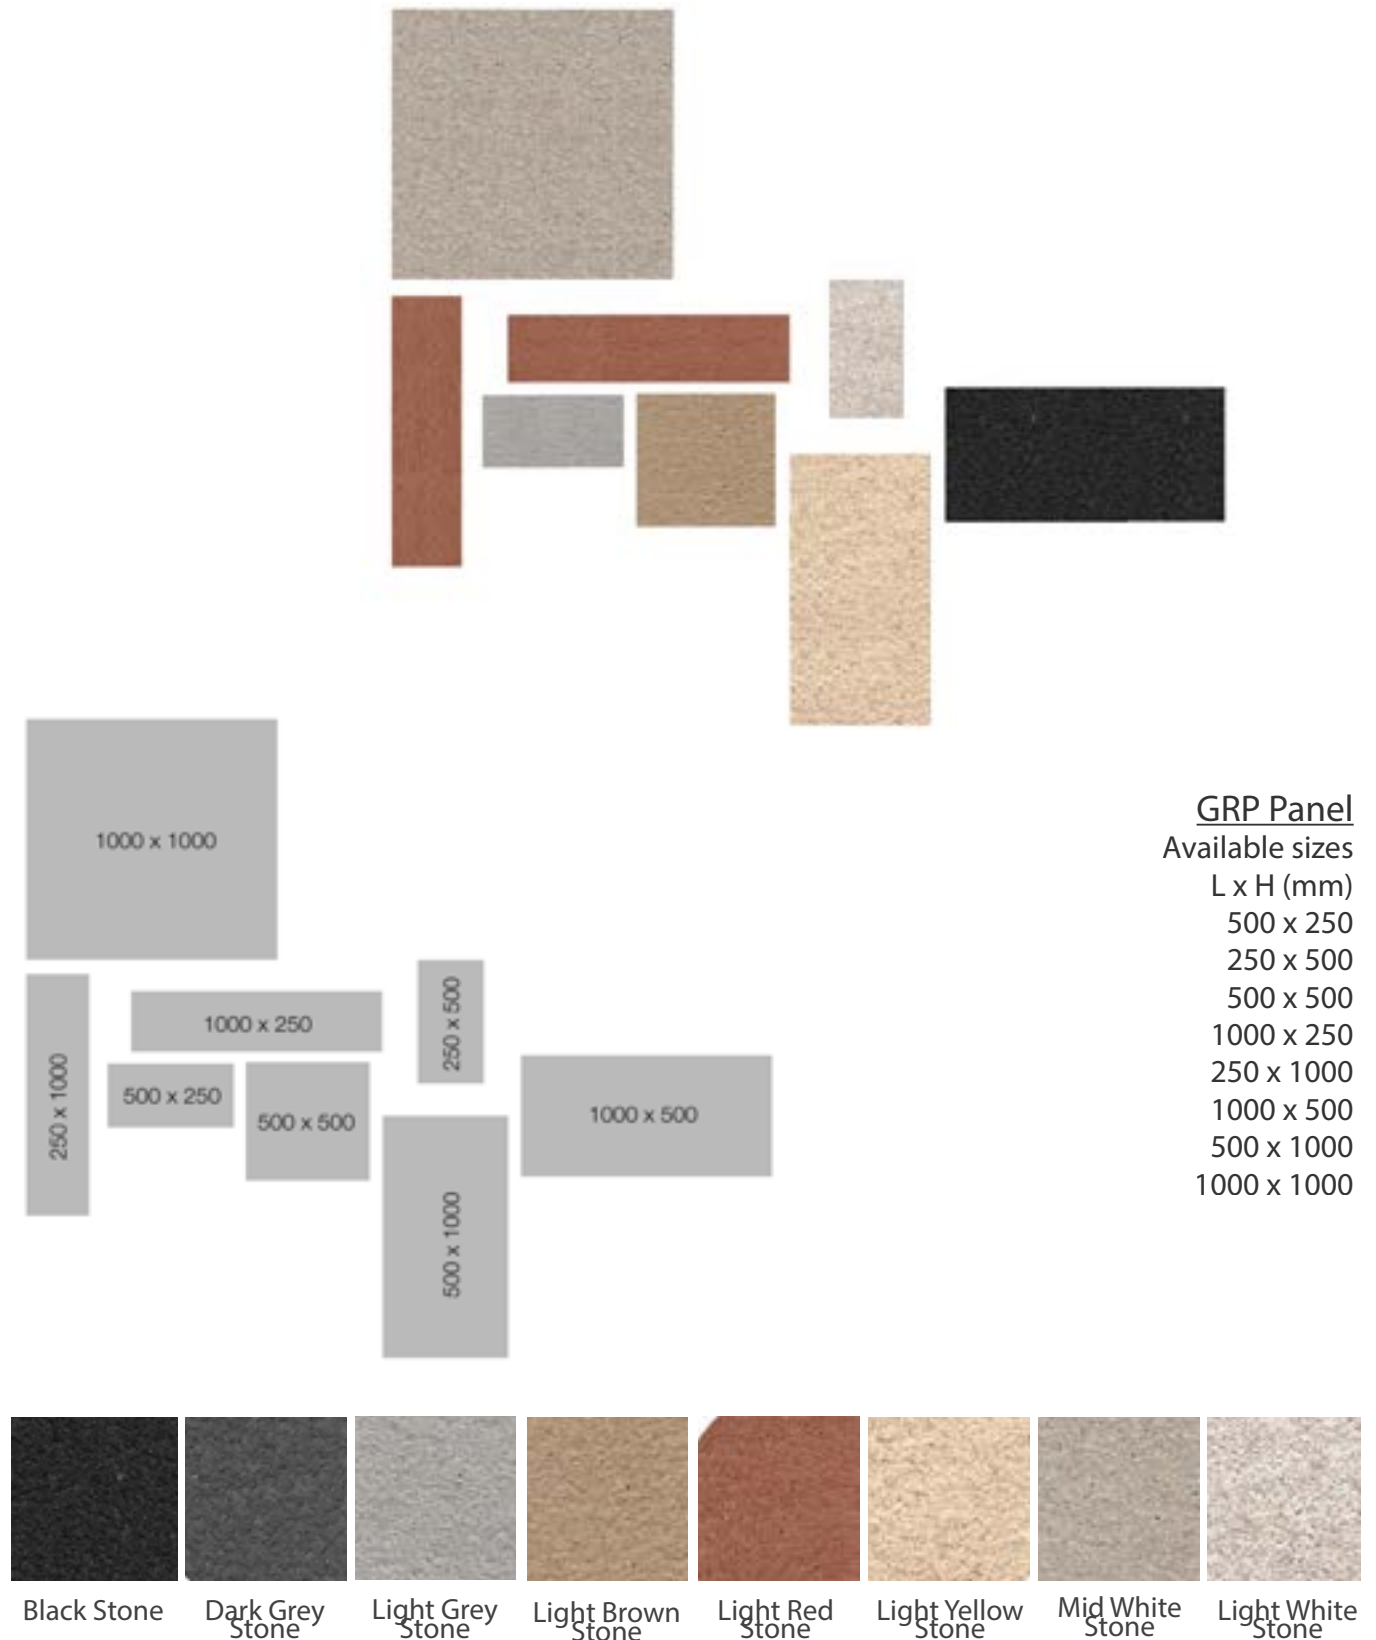

natural panels

The natural range features Fibreglass panels supplied in our unique 'natural' finishes as developed for our market leading planter ranges. To these we have added new Light Bronze, Brass, Iron and Steel, all of which, like Corten steel, include real metal to create the illusion of solid metal panels – but without the weight and cost. These beautiful panels are the perfect complement to the natural greens of moss and greenwalls.

premium stone panels

Available in all the standard panel sizes, these are fibreglass frames with the robust Premium Stone finish which has the look and feel of solid stone but at a fraction of the weight and cost.

logo / image panels

The beauty of the Feature Wall is that it provides the opportunity to include panels featuring pictures or logos making it ideal for any area where information needs to be given – receptions, meeting rooms, floor levels, showrooms – where a company's products can be illustrated, restaurants, wedding venues – the list is endless.

We simply need high resolution files of the pictures or logos you want to include or, for a theme, we can even source and supply these for you.

feature panels

If you want to create a bit more interest or functionality in your Feature wall, or even include an element of live planting, take a look at these Feature panels. In the various sizes shown, its possible to include in your wall panels raised patterns, domes, shelves and planters which can be specified for use with either live or artificial plants.

Feature panels are available in all painted colours and natural finishes to your specification.

freewall

freewall

FreeWall brings room dividers to life, with one of our standard greenwall mixes or your choice from the Greenwall plant toolkit.

Plant both sides or specify the rear as a blank panel for use as a notice board, logo display or signage. Go mobile with our castor base option.

Code

FWALL1	1000 x 400 x 1200mm	1 Panel
FWALL2	1000 x 400 x 1600mm	2 Panels
FWALL3	1000 x 400 x 1800mm	3 Panels

All available as an option with castors.

1 sided option :
With logos/graphics on reverse

2 sided option :
- can have all of one foliage
- can have mixed options

buxus hedging

Beautifully constructed replica Buxus hedging made using only composite frames and stainless steel pins for unbeatable longevity.

buxus hedging

Our hedges can be manufactured in any height, width or length and to fit any planter, including curved and are suitable for both outdoor and indoor use.

Order pre-fitted to planters and have the whole job delivered to site for final placement. UV resistant, weather resistant, removable for repair off site. They can be supplied in lengths for seamless joining to make runs of any length.

low hedge / high planter

medium hedge / medium planter

high hedge / low planter

Curved Buxus

curved planter with hedge

buxus hedging

For interior use we also recommend our unique fibreglass frames, but where cost is an issue we are happy to also construct your hedges on painted Sterling board frames in the traditional way.

We do not offer these for use outdoors however as we cannot provide any guarantee regarding their suitability for anything other than temporary installations.

bespoke trees

These are quite simply the most realistic artificial trees on the market. Each one is hand built by genuine artists who have developed a building technique over many years that can create the ideal tree for every situation. Every detail, the clear stem, the width of the canopy, the number and location of branches, the shape and thickness of the crown, the number of leaves – simply everything can be specified and a drawing supplied for approval before the magic begins. Best of all, access is never a problem. These trees are supplied as 'kits' that are easily assembled on site. Typically a 4m tree can be supplied on a single pallet. We have supplied trees of up to 8m height with a 4-5 m spread that could be taken up a typical single width staircase and installed many floors up.

Much of our work comes in the form of repeat business or personal recommendation as our clients are so bowled over by the change in a building's ambience that these trees create. Everything is available, from beautiful blossom trees, to majestic European oaks, tropical Ficus and Mediterranean olives. The tree shown on the following pages are illustrative of type only – they were all created for individual clients and give you a taste of the different tree types available and how they might typically look – however remember, the detail is up to you.

bespoke trees

Design it - Olive tree case study

A new high end restaurant wanted a feature Olive tree to form the centre piece of their main dining room. However it needed to fit exactly into a reflective dome on the ceiling with a spreading canopy for diners to relax under. Drawings were made of the exact shape and dimensions required for the client to approve along with samples of the foliage type to be used.

bespoke trees

The tree was delivered to site on a single pallet and the landscaper assembled it from the full illustrated instructions supplied within an hour.

Now, its famous, used in all the restaurants' marketing material and always a talking point amongst guests, who usually want to rub the leaves as they simply don't believe it isn't alive.

bespoke trees

The secret of our bespoke tree kits is the invisible joints between trunk and branches that are created using metal sleeve inserts with male and female ends that marry together for a truly seamless fit. All branches and their partners are supplied labelled so building is a breeze.

Our preference is to use real recycled trunks and branches to create each unique tree, however, resin trunks are also available.

As you can see in the pictures above the branches slot together in order to create a full head in a matter of minutes.

The pictures on the page opposite show the installation of a tree in a shopping mall. Here the landscaper secured the trunk into a suitable planter (using the bucket base) and then with only the help of a step ladder, two people were able to assemble the whole thing into a beautiful 5m tree in a matter of minutes.

bespoke trees

A steel base plate can also be supplied for direct bolting to the floor with the option for larger trees to have the trunk holder clad with bark.

standard trees

standard trees

With sizes from 2 – 8m tall and a vast range of species represented, including many different varieties of palms.

These trees have all been specially selected to represent outstanding value for money combined with a realistic appearance, many featuring natural stems.

The section shown below is not exhaustive and availability cannot be guaranteed so please always check before you specify.

As with all our replica plant selection, if your chosen tree isn't in stock we will always source and offer an alternative from our many partners in Europe and beyond.
