## Bespoke Water Feature - RHS Chelsea 2023

Livingreen Design were delighted to collaborate with Paul Hervey-Brookes to create a bespoke water feature for the Brewin Dolphin garden at the Chelsea Flower Show 2023.

Now known as the 'Divona' range, you can order your own, or a smaller version on our website. See inside for how this beautiful feature was created and more about our other extensive range of water bowls, water spheres, water tables, bespoke fountains and waterfalls.

Livingreen Design is a specialist UK manufacturer of products for the commercial landscape industry including planters, furniture, water features, water butts and beautiful moss wall creations. We focus on bespoke, working with gardens designers and landscape architects to bring even the most challenging schemes to life. You can also order our standard commercial grade products online for home use. The best quality on the market and 100% made by hand in our own UK workshops.

## How we made it - Creating a Masterpiece

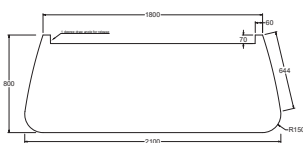

Producing a unique 2.1m diameter water bowl is harder than you might think. The best material for making water features is a fibreglass based advanced composite, similar to that used for wind turbines and modern aircraft - its light, super strong, inherently waterproof and totally frostproof. The story below shows the progression from idea to finished product, complete with a new surface coat to replicate the look and feel of a handthrown clay pot, but with a metallic sheen, specially developed to fulfil the concept of the garden's design.

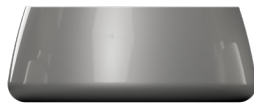

Divona Water Bowl - Artisan finish in Russet

Concept

Outline design

3D Render

CNC cut tool

Moulding in fibreglass

Fibreglass laminating

Rough completed bowl

Prepped for finishing

The magic touch!

## Our Standard Water Features & Bespoke options

We have a fantastic standard range of 100% British built composite water features that can be supplied to order in a huge variety of colours and specialist finishes, including stone, Corten steel and Verdigris. Our products have featured on many show gardens and TV programmes including, Love Your Garden. Bespoke features are our speciality and can include multi-bladed water walls and fountains.
